Etienne Lee

etiennelee123@gmail.com | (267) 530-8931 | www.linkedin.com/in/etienne-lee- | https://github.com/EtienneLee

Junior | B.S.E Computer Science + Accelerated M.S.E Data Science | GPA 4.0/4.0

EDUCATION

University of Pennsylvania, SEAS, Philadelphia, PA *August 2023 – May 2027*

B.S.E. in Computer Science; **M.S.E.** in Data Science (Accelerated, 2025 - 2027)

TECHNICAL SKILLS

Languages: Java, Python, C, JavaScript/TypeScript, HTML/CSS, SQL, Bash, RISC-V Assembly, OCaml

Frameworks: React, Node.js, Next.js, Scikit-learn, PyTorch

Tools: Git, MongoDB, PostgreSQL, Neo4j, AWS, Postman, Google Colab, LaTeX, Docker

WORK EXPERIENCE

Conversion Capital | Data Science Intern, New York *June 2025 – August 2025*

- Designed a data enrichment pipeline connecting Notion, Affinity, and Specter to track key investment signals across thousands of sourced companies, identifying opportunities ahead of market competitors
- Automated syncing between CSV and Notion using Python and VBA macros, eliminating redundant data entry

Neopets | Software Engineering Intern, Hong Kong *June 2024 – August 2024*

- Spearheaded the development of two proof-of-concept web applications—a browser extension and a multiplayer game demo—mainly using React, TypeScript, Node.js and Socket.IO
- Engineered frontend interfaces with React while contributing to backend functionality including user authentication, achievement tracking, and real-time multiplayer communication via Socket.IO.

University of Pennsylvania | Teaching Assistant, CIS 5500: Databases *August 2025 – Present*

- Graded weekly assignments, held office hours, mentored project groups, and created homework/exam questions for 200+ students

PROJECTS

New Tab Photo Extension (TypeScript, React, Vite)

- Developed a Chrome new tab extension that displays photos from a user-managed collection (up to 50 images).
- Implemented features for photo upload/deletion, random selection, and a persistent search bar within the extension.

Steam Game Success Predictor (Python, Pandas, Scikit-learn)

- Led ML project predicting video game success using Steam dataset of 97K games
- Performed data cleaning and feature engineering; evaluated multiple ML models to maximize F1 score

Ocean Biodiversity & Climate Change Explorer (React, Node.js, PostgreSQL, AWS)

- Developed an interactive website integrating oceanographic data to explore marine biodiversity-climate relationships.
- Led database architecture and full-stack development: designed schemas, optimized queries, and built frontend

PennOS (C, Bash)

- Co-developed a UNIX-like guest OS featuring a priority scheduler, FAT filesystem, and interactive shell
- Built and integrated filesystem with kernel from scratch, enabling file operations and UNIX commands (cat, mv, ls, etc.)

LEADERSHIP AND HONORS

- **Hong Kong Junior National Tennis Champion** (2022); Member, Hong Kong National Tennis Squad (2016 – 2023)
- **Hong Kong National Pickleball Champion** (2021)
- **First Place (Best Overall),** Penn NSF HDR ML Hackathon (2024)
- **Founder,** Tennis SENsation (2022 - Present): Led weekly tennis program for children with special needs
- **Recipient,** Hong Kong Scholarship for Excellence (2023)
